

Restless Pre-Opening Musings from your President,
Sportsmen & Women of the Tonawandas Sportsmen's Club,

As we enter a chapter never before realized at TSC, please note the following:

Those members golfing in lieu of shooting, here are two factors of safety severely lacking on the golf course.

- 1) I have personally observed golfers wearing attire so "freakin loud" that ear plugs and muffs should be mandatory to lessen the damage.
- 2) The clothing is not only loud, but blinding. If shooting station seven in July on a Wednesday at the Club requires sunglasses, a portly golfer bending over in hot pink trousers requires a welding mask!! Sorry to you fashionistas, hot pink is not salmon and chartreuse is the color only a walleye would love!

Please abide by all procedures. They must be adhered to for the safety of everyone. We have all been shackled to self-entertainment for the most part. It's not the fault of our staff for obeying the protocol by which TSC must abide. We all need to be patient, understanding and willing to follow the rules. The best advice I've given to any new member is, "You don't want to be THAT guy" (Sorry Ladies, it just sounds better that way and makes it a "guy thing").

If you think you have it bad.....Burp 2.0 was just neutered and has to wear a cone in 80 plus degree weather. Clearly his self-entertainment came to an abrupt halt. Future musings are always possible, until then, stay safe and happy!

Jim Trottman
